

ABSTRACT

The present invention is related to compounds represented by the following formula, or salts or hydrates thereof

wherein,

T¹ represents a 4- to 12-membered heterocyclic group containing one or two nitrogen atoms in the ring, which is a monocyclic or bicyclic structure that may have one or more substituents;

X represents a C₁₋₆ alkyl group which may have one or more substituents, or such;

Z¹ and Z² each independently represent a nitrogen atom or a group represented by the formula -CR²-;

R¹ and R² independently represent a hydrogen atom, a C₁₋₆ alkyl group which may have one or more substituents, or a C₁₋₆ alkoxy group which may have one or more substituents, or such.

These are novel compounds that exhibit an excellent DPPIV-inhibiting activity.
